

Landscape Consultancy Services

Edge Hill University: Eastern Campus

Client: Edge Hill University, Ormskirk, Lancashire

Milieu Landscape Design have been providing Landscape Design Services for the University since 1996. 2014 saw the completion of the University's Eastern Campus Development. Situated between the 1930s central campus and the new 25ha sports development, the Eastern Campus combines residential and teaching buildings within a varied and detailed landscape infrastructure including a new lake, quayside footpaths and a 'plage'. The lake, designed on sustainable principals to accommodate and attenuate surface water run-off as well as creating a feature of visual amenity, creates a character link across the campus with the Western lake and unifies the core of the campus.
